PROFESSIONAL EXPERIENCE

The Cigna Group – Project Management Intern (Platforms Team)

Summer 2025

- Improved enterprise workflow visibility for a **GenAI** plugin pilot by designing and maintaining an insights tracker across 40+ users, analyzing pilot dashboard data, deriving composite metrics, and translating findings into a user narrative that directly shaped go-to-market feature decisions and roadmap priorities presented to leadership
- Accelerated sprint delivery across a 10+ person Agile team by analyzing backlog data to surface inefficiencies during backlog grooming, producing data-backed feature prioritization counsel projected to reduce average ticket age by **30-40%**
- Reduced merge conflicts and onboarding friction for a nationwide intern cohort by scoping and delivering technical documentation and walkthroughs covering source control, React, and enterprise workflow tooling

The Cigna Group – Software Engineering Intern (UI Core Engineering Team)

Summer 2024 & Spring 2025

- Delivered a go-to-market proof of concept projected to save \$1M+ in support costs by **scoping and shipping** an end-to-end AI-powered web app with an integrated chatbot, Okta-based authentication, and REST API integrations, demoed directly to senior stakeholders
- Strengthened privacy and user trust in enterprise software by building 3+ production-ready UI components in React and TypeScript, collaborating cross-functionally with engineers and designers through accessibility reviews and pair programming sessions to meet compliance and brand standards

RELEVANT EXPERIENCE

National Society of Black Engineers (NSBE) – Washington University Chapter President

May 2025 – May 2026

- Scaled conference access for 110+ chapter members by securing **\$30,000+** in funding through a university administration partnership, growing AFROTECH attendees by **36% (from 11 to 15)**
- Reduced tool fragmentation across a 15+ person board by scoping requirements, evaluating competing platforms, and implementing a custom Notion workspace, applying the same product decision framework used to configure and maintain enterprise tooling environments

Fostering Healthy Identities & Resilience (FHIRE) Collaborative – Assistant Project Coordinator

May 2024 – May 2026

- Generated actionable insights on STEM persistence for 80+ participants by conducting 10+ qualitative user interviews, processing AI-generated transcripts, and coding data to identify patterns, which translated findings into structured recommendations that informed evidence-based interventions

McKelvey School of Engineering – Computer Science Teaching Assistant

Jan 2023 – May 2026

- Improved performance for 50+ students a semester by delivering instructional support across three CS courses (Intro to CS, Software Engineering Principles, and Data Structures & Algorithms) through studios, labs, and office hours

SKILLS & INTERESTS

Product Management: Agile, Scrum, JIRA, Confluence, Asana, Figma, Backlog Grooming, Cross-Functional Collaboration, User Interviews, Data Analysis, Go-to-Market Strategy

Technical: Python, JavaScript, React, Node.js, TypeScript, REST APIs, Git/GitHub, MySQL, Microsoft Teams

AI & Analytics: Claude, ChatGPT, Cursor, Copilot, Amplitude, Dashboard Analytics, Composite Metrics

EDUCATION

Washington University in St. Louis

May 2026 | GPA: 3.89/4.00 | College Honors

B.A. in Psychological & Brain Sciences, Minor in Computer Science, Minor in African & African American Studies
